

M2Desk-Classic special

By offering the M2Desk Classic Special, M2Desk has the ergonomic workplace for people with a physical disability. This table top has a special abdominal recess. Because of the fact the M2Desk Classic Special works on a battery, the unit is totally wireless and cordless. This solution is perfect for people with a physical disability. The tabletop has an integrated mouse-tablet. Working with the digital pen provides a continual support of the arm. The HR-touchscreen features palm suppression, which means that when writing on the touch screen, the pressing of the palm of the hand on the screen is not registered. Because the monitor is attached to the table top, it can perfectly set by people who has less developed motor skills. The unit offers a strong support during controlling and setting the M2Desk Classic Special into the correct height, distance and angle which are meant for the relevant activities. The M2Desk Classic Special can be used in regular education but works also perfectly in special (cluster) education.

M2Desk-Classic special is:

- Ergonomically sound
- Noiseless and generate no heat
- Perfectly set by people with a physical disability
- The touch screen is water and moisture resistant
- Totally wireless and cordless
- Works on a battery that can be recharged externally
- Can be mounted on any frame

There is also a M2Desk Classic Special for people with visual disabilities.
